

Secure Shredding Service

What services & solutions do we offer?

On & off site shredding depending on your security requirements:

- On-site shredding involves a secure shredding truck visiting your premises and shredding your confidential waste there and then, right in front of you. It's quick, discreet and very secure
- Off-site shredding involves collecting your material in locked, GPS-monitored trucks and transporting it to a secure local shredding facility where it is shredded, baled and then recycled

Why Shred?

Every company produces information that could be defined as confidential. If you are not currently disposing of this confidential data securely, then it is likely that you could be found in breach of the Data Protection Act (DPA), exposing your business to fines of up to £500k (with regulation changes due in 2018 making this even more significant).

We can work with you to ensure you are fully compliant, and just as importantly, make certain that you do not fall victim to growing identify fraud crisis:

- Identity fraud costs the UK £5.4bn each year, affecting 3.25m people
- The average loss per individual is £1,600
- Financial loss due to fraud is taking place at £6,000 per second
- The ICO reported that in Q4 2016, there was a 22% increase in the number of data security incidents resulting from loss or theft of paperwork

Our shredding service will also reduce your carbon footprint. We guarantee your shredded

paper will be recycled into 'new-life' products such as kitchen paper and facial tissues.

OFF SITE

ON SITE

Off-site shredding service means material is transported in locked, GPS-monitored trucks to a secure local shredding facility where it is shredded, baled and then recycled. You can watch if you wish and, on completion, you will receive a certificate of destruction. Giving you complete peace of mind.

Gives you peace of mind, knowing that your confidential material has been destroyed – confirmed by a certificate of destruction given to you there and then. It also verifies a complete chain of custody from point of collection, removal to parked mobile shredding truck, document destruction and recycling.
